

Curved Panel Glide System Silent Gliss 2730 Flex

Flex – the New Panel Glide Generation

New Inspiration for Windows and Interiors

Corners are passé with the new curved Panel Glide System Flex from Silent Gliss. Innovative technology allows the panels to glide in curves in front of windows and walls, completely silent and in virtually any room layout.

So even when used as a room divider or design statement, there's no limit to your creativity.

Silent Gliss 2730 Flex – a Curved Sensation

The first of its kind in the world – the system Silent Gliss 2730 Flex can be used with every possible room layout. The adjustable track allows it to be used as a design element or a room divider. The unique flexible carrier allows the panels to glide smoothly and silently.

Around the Corner

The Silent Gliss 2730 can be bent to a 15cm radius (90° angle), to allow panels to be stacked on return walls, offering undisturbed views and maximising light.

Silent Gliss 2700

Following on from the classic System 2500, the innovative System 2700 combines a new track with a unique carrier with sophisticated roller gliders which gives an even smoother and silent panel gliding action.

A wide range of fabrics, many operation options (free running, hand, cord or electric), and a new transparent carrier with a click-in feature make this system truly one of a kind!

Silent Gliss is the leading global supplier of motorised and manual curtain and blind systems in the high quality market. We offer our customers the very best in terms of quality, design, technology, service and individuality. Our core competence is innovation - inspired and driven by customer needs. A team of highly skilled and experienced professionals continually work on new developments as well as on the improvement of existing products. With committed customer support teams, Silent Gliss provides an extensive range of services including technical advice, fitting services and maintenance all around the world.
