

Silent Gliss Folding Panel

Panel Glide Systems Silent Gliss 2600, 2640 & 2650

Creativity

Discover unique elegance.

The Folding Panel product range is a revolutionary new window treatment solution from Silent Gliss. It's a highly innovative way to dress a window and define the look of a room.

Create natural elegance through the cool sophistication of sheer fabrics or sumptuous luxury with bright colour combinations. Or why not craft something completely original through unique fabric make-up?

Silent Gliss invites you to enter the inspiring world of the Folding Panels, explore creativity and discover the opportunities of those unparalleled products.

One window treatment – countless different looks.

Spring sunshine – make the most of it! The folding panels stack back into a small area to expose the maximum amount of window.

Stylish but unobtrusive. The clean lines of the completely folded panel give a pared down elegance and allow a remarkable view outside.

Folding Panel at its best – refined sophistication for a room. The softer folds create stunning spatial effects and a distinctive atmosphere.

When closed, for maximum privacy, the panels retain a unique shadow fold, adding a 3-dimensional shape and depth to the window treatment.

Facts

The Folding Panel can be up to 5 metres long with a maximum drop of 3 metres.

Regarding the panel sizes, customers may choose between 3 size ranges:

- Small = 40 – 57cm
- Medium = 49 – 66cm
- Large = 53 – 72cm

One system can carry up to a maximum of 8 panels.

Simplicity in the extreme, the fabric panels hang from discreet gliders using a Velcro® carrier. This means the panels can be easily removed for cleaning or exchanged.

The various stacking possibilities make Folding Panels suited to large glazed areas and areas with glass doors.

Unlike Panel Glide, the Folding Panel will never lay completely flat – when fully closed there will always be a slight fold down the centre of the panel, this is what creates the 3-dimensional effect. However, your privacy is ensured through a slight overlap between each of the panels.

Operating Methods

2600

A single chain operates the folding as well as the opening and closing of the system.

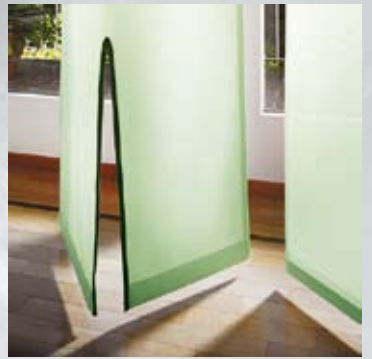

2640

Crank operation provides an easy and comfortable way to control the panels.

2650

A motorised system is available and can be operated by fixed wall switch or remote control.

Silent Gliss is the leading global supplier of motorised and manual curtain and blind systems in the high quality market. We offer our customers the very best in terms of quality, design, technology, service and individuality. Our core competence is innovation – inspired and driven by customer needs. A team of highly skilled and experienced professionals works on new developments and the improvement of existing products. With committed customer support teams Silent Gliss provides an extensive range of services including technical advice, fitting services and maintenance all around the world.
